**REGULATION OF ACCESS TO THE GRID INSTALLATION OF NATIONAL INTEREST**

**IFIN GRID**

The access of the users to the services provided by the Grid Installation of National Interest (IOSIN GRID - IFIN GRID) is virtual and secure, based on Grid X.509 certificates. Physical (local) access to IFIN GRID centers is allowed only to Grid infrastructure operators / administrators.

The public information regarding IFIN GRID and the access to it is made through the web page of the installation (<http://grid.ifin.ro/ifingrid.php>).

The access of the users not hired at IFIN-HH to the IFIN GRID services for the development of their own or collaborative computing projects is made in accordance with the regulation elaborated by the installation coordinator and endorsed by the state authority for research and development.

In order for a user to benefit from the computing resources that IFIN GRID offers to a virtual research community (virtual organization - VO), the certificate of that user must first be registered within that VO. The procedure for registering a certificate in a VO is regulated by the VO management.

The registration request and the access of the users to the three VOs managed by IFIN GRID is made from the web page <http://grid.ifin.ro/accesui.php>.

The procedure for granting access to these VOs is described at the addresses <http://grid.ifin.ro/eli-np.eu/>, <http://grid.ifin.ro/gridifin/>, <http://grid.ifin.ro/ronbio.ro/>.

The VO manager requests the applicant to fill in the access form, available at <http://cc.ifin.ro/users/aaf-grid.doc>.

The access request is analyzed by the Computing Resources Committee (CRC) within IFIN-HH.

Based on the information provided by the applicant in the form, the CRC grants access priorities to the user depending on the scientific relevance, the research problems to be solved and the estimated scientific impact of the proposed computing project.

If the request is approved by the CRC, the VO administrator registers the user's certificate in the access database.

DIRECTOR GENERAL

Dr. Nicolae Marius Marginean
